Pushing the Envelope

Building Envelope News, Advice, and Events

You're Invited to a preview of a European Rain Screen Curtain Wall

In June of 2010, we will be directing the construction of several large (30' x 30') visual mock-ups of a European rain screen curtain wall. We are seeking input from RA Design Professionals with interest, expertise, and specification authority in exterior facade design to visit the site to observe this European curtain wall product that has been in use since 1992. We are assisting our client in obtaining information which will allow them to make decisions relative to North American market introduction and penetration.

ATLANTA, GA: (on masonry block wall)

While the exact calendar dates are yet to be confirmed, we expect to begin the installation on June 14, 2010, and thusly would expect observations to begin after noon on June 17, 2010. This will be a permanent install. Contact Mark Coulis below for address.

YPSILANTI, MI: (on sheathed steel stud wall)

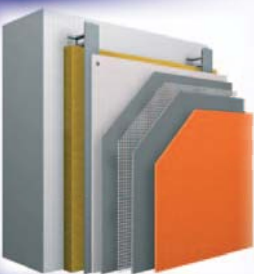

While the exact calendar dates are yet to be confirmed, we expect to begin the installation on June 28, 2010 and thusly would expect observations to begin after noon on July 1, 2010. This will be a temporary install through summer 2010. Contact Mark Coulis below for address.

Please RSVP to Mark Coulis, LEED AP
